

Retell AI Topic 3 Assessment Documentation

Voices, Speech Synthesis, & Pronunciation

Agent: AI Customer Support Agent

Workspace: my-project

Model: GPT 5.6 Terra

Voice: Cimo (retell-Cimo)

1. Assessment Overview

This document records the Topic 3 configuration and live-test evidence for the Retell AI customer support voice agent, covering speech synthesis, speech rate, pronunciation, expressive delivery, multilingual configuration, call behavior, and latency evidence.

2. Voice Configuration

Setting	Value	Status
Provider	Retell Platform Voice	PASS
Voice	Cimo	PASS
Voice ID	retell-Cimo	PASS
Speech speed	1.00	PASS
Expressive Mode	ON	PASS
Volume	Normal / middle	PASS
Background sound	None	PASS
Pitch	Not exposed by Retell	NOT AVAILABLE

3. Pronunciation Dictionary

Word: Retell AI

Alphabet: IPA

Phoneme: rɪˈtɛl eɪ aɪ

The pronunciation entry was corrected and saved without leading or trailing slash delimiters.

4. Multilingual Configuration

Language	Locale	Status
English (US)	en-US	Configured
English (India)	en-IN	Configured
Hindi (India)	hi-IN	Configured

The three locales are configured on the agent. The submitted live call did not separately test spoken output in each locale.

5. Live Loom Test

A live interaction was recorded through Loom. It covered the greeting, a request about Retell AI, a request to repeat the company name, a password-reset question, an interruption attempt, and call closing.

6. Test Transcript Summary

Time	Speaker	Summary
0:00	Agent	Customer support greeting.
0:09–0:13	User	Asked about Retell AI and support capabilities.
0:18	Agent	Said it did not have information about Retell AI and offered general support.
0:31	User	Asked the agent to repeat the company name.
0:34	Agent	Said it did not have a company name available in the conversation.
0:40	User	Asked how to reset a password.
0:44	Agent	Suggested checking the sign-in page for a Forgot Password option.
0:53–1:03	User	Interruption / closing interaction.
1:06–1:08	Agent	Thanked the user and ended the interaction.

7. Latency and Call Logs

An existing successful call provided baseline latency evidence. These measurements predate the final pronunciation, Expressive Mode, and multilingual changes, so they are documented as baseline evidence.

Metric	Observed
LLM p50	827 ms
LLM p95	1555 ms
TTS p50	162 ms
TTS p95/p99	204 ms
ASR p50	223 ms
ASR p95	437 ms
E2E p50	1566 ms
E2E p95	2435 ms
E2E p99	2485 ms
Call duration	~117 s
Call status	Successful

8. Natural Voice / Validation Notes

The current configuration uses Cimo at speed 1.00 with Expressive Mode enabled, normal volume, and no background sound. The live recording demonstrates the agent's greeting and support interaction. However, the agent did not repeat the brand name when asked, so the custom pronunciation rule was not conclusively validated by audio in the submitted call.

The three configured language locales were not individually live-tested in the submitted call.

9. Final Checklist

Requirement	Status
Speech synthesis provider	PASS
Cimo voice	PASS
Speech rate	PASS
Pitch	NOT AVAILABLE — not exposed

Requirement	Status
Pronunciation dictionary	PASS
Custom IPA pronunciation	PASS
Expressive Mode	PASS
English (US)	PASS
English (India)	PASS
Hindi (India)	PASS
Live test recorded	PASS
Brand pronunciation validated by live speech	NOT CONCLUSIVELY VALIDATED
Natural voice quality verified	PARTIAL
Multilingual speech live-tested	NOT TESTED
Call/latency evidence reviewed	PASS / baseline

Prepared for Retell AI Topic 3 LMS submission. Evidence and limitations are stated conservatively based on the recorded test and configured agent state.
